## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 15,28,33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yachia et al. (5246445) in view of Mikus et al. (5830179) and Razavi (5961547). Yachia et al. disclose a stent (Fig. 1c) with a body wall that has a bulbous middle section, proximal and distal end areas that have increased diameters. Yachia also discloses the stent can be made from Nitinol (inherently superelastic) with a coating, col. 4, lines 32-43. Yachia additionally discloses the stent is made such that it is collapsible and expandable after insertion, col. 5, lines 50-59. However, Yachia et al. do not disclose the proximal and distal ends to be entirely flared outward and to use a biodegradable coating on the stent. Mikus et al. teach that stents are flared (Fig. 7) at their proximal and distal ends for anchoring in the lumen of a patient, col. 6, lines 37-39. Razavi teaches the use of biodegradable material as a coating on a temporary Nitinol stent, col. 6, lines 11-15. It would have been obvious to one of ordinary skill in the art to incorporate flared ends as taught by Mikus et al. in the stent of Yachia et al. as modified by Razavi in order to prevent dislodgement of the stent in the lumen of the patient. It would have been an obvious expedient to use a biodegradable coating on the stent as taught by Mikus with the stent of Yachia as modified by Mikus such that a coating protects the vessel walls from any trauma of the stent by providing a smooth surface.

***Response to Arguments***

Applicant's arguments with respect to claim 33 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
